Telephone numbers to be used in case of emergency only.

### Communications

A **mobile website** is available on [www.euroglide.nl/mob](http://www.euroglide.nl/mob). This very light website is designed for use with a smartphone. It is not an app, so just use the browser of your smartphone or laptop. The site allows you to **report your position**, view the reported positions of other teams, **view notifications** from the Euroglide contest officials (notice board), **add shouts** and view the shouts of other teams. Information entered via the mobile website is also visible on the ordinary website <http://www.euroglide.nl/dayrep.php>

### Notice board

The contest officials post messages on the notice board. Teams must **check the notice board each day after 22:00**. Some notifications must be **confirmed**. The request for confirmation appears automatically when a team logs in on the mobile website.

### Mandatory daily progress reporting

- Report the **airfield** where you are or where you plan to depart the next day.
- On the mobile website, login with your team loginid and password.
- Enter the ICAO code or a part of the name or a part of the city of the airfield.
- The system returns one or more airfields. Select the appropriate airfield.
- Once entered, you can change the airfield as many times as you like. The system locks at midnight. Your (changed) position is shown on the map on the Euroglide site immediately, and also available on the mobile site.
- If your airfield is not available in the database, report this in a "shout".
- No internet access? Call a friend at home to access the internet for you.
